Authorisation management .....	3
Adding an authorisation.....	3
Deleting an authorisation .....	4
Configuring user authorisations.....	5
Via the user window .....	5
In the user creation wizard.....	6

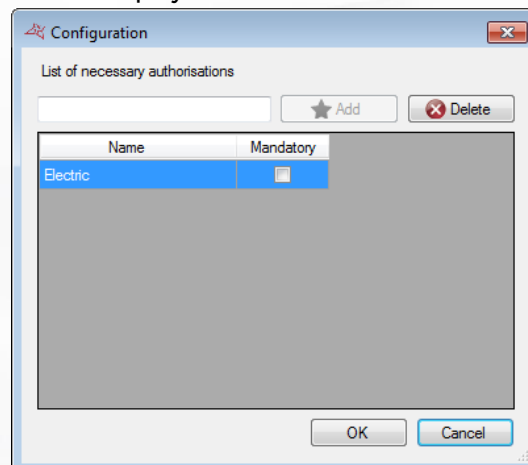

## AUTHORISATION MANAGEMENT

From the Tools menu, select Site module.

A list of necessary authorisations is displayed:

## ADDING AN AUTHORISATION

Enter text in the list of authorisations and click on "Add".

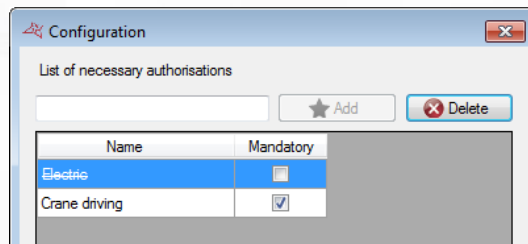

The authorisation is added to the list. Tick the "Compulsory" box if needed.

## DELETING AN AUTHORISATION

Choose an authorisation to be deleted from the list and click on "Delete".

The authorisation will be deleted during page validation.

# CONFIGURING USER AUTHORISATIONS

## VIA THE USER WINDOW

Open the user page and go to the "Site module" tab.

Libellé	Date d'expiration	
Conduite d'une grue *		Supprimer
Electrique	22/02/2018	Supprimer

Présence  
Indéterminée

**Form this tab, you can:**

- + Choose an expiry date for each authorisation.

Based on the entered dates and the current validity dates, one of two messages may be displayed during validation:

- + In the case where the authorisation dates expire before the current validity date:

- + In the case where the current validity date is less than the smallest closest expiry date:

## IN THE USER CREATION WIZARD

When creating users using the wizard, on the page for entering identities, you have the option to enter authorisation expiry dates.
